

Experience Engagement in Action!

INVENTING THE FUTURE WE WOULD LOVE TO WORK IN NOW

IN COLLABORATION WITH THE WORK
REVOLUTION

We are bombarded every day with the reality that the world of work, as it's currently designed, just can't keep up. We are tasked to do more with less when there is more and more to do.

We are urged to think outside of the box and yet our hierarchical models keep us confined in roles defined by titles and tasks that are organized around functions, sectors and silos.

We live in a world that requires agility and speed, integration and not separation. We require more collaborative approaches to handle complexity with new ways of working that are less about planning and predicting and more about doing together.

We need more trust and less control if we are to unleash the wisdom, passion, innovation and creativity that will generate success in the future.

Everyone knows that we're stuck in our old ways of doing things which are completely inadequate for these times, and research shows that 79% of employees are not passionate about their work.

Leaders and people across the hierarchies are yearning for so much more in their lives.

We want that too and that's why we are inviting you!

Tuesday and Wednesday, June 10 - 11, 2014

At the Nicollet Island Pavilion, 40 Power St., Minneapolis, MN

Featured author, work revolutionary and tribal igniter

Josh Allan Dykstra will kick off the event

In his book **IGNITING THE INVISIBLE TRIBE**
Designing an Organization That Doesn't Suck

Josh says: "People want work to be
CONNECTED, HUMAN and MEANINGFUL!"

WHAT YOU CAN EXPECT...

High Engagement, Lots of Collaboration, New Insights and Tons of Take-away Learning.

This will be a roll up your sleeves and jump on the court, two-day engagement experience in action. We will be revolutionizing how we attend and meet in a conference or workshop.

Attendees will rapidly create the agenda together; they will self-organize in multiple concurrent discussion groups on what they care about most; everything that is discussed will be documented in real time, on site. Every single participant will have the opportunity to share experiences, ideas, tools and approaches, success stories and more.

We will even have a window to the outside world through social media.

It will be energizing, igniting and unlike anything you've ever experienced before. Breakthrough learning that has direct application and can be implemented immediately in the workplace.

We will be using and learning the simple and proven methodology of Open Space Technology to tap into our collective wisdom and to unleash leadership from within. This level of engagement is at the heart of the mastery, quality and high performance at work that we all want to see. We will experience this level of high engagement, and we will learn how to use it back in our organizations.

Who will be there...

Diverse individuals and teams working in progressive and traditional companies now. Entrepreneurs, consultants, authors, educators, researchers and others who are committed to revolutionizing and transforming the workplace. High potential performers, who have much to learn, share and discover together. Passionate participants, 100% engaged around co-creating the future we'd love to work in NOW as they connect and discover powerful collaborations just waiting to happen!

Our promises...

We will leverage our abilities to connect and collaborate beyond expectations! We will be able to apply our experience of engagement in action to meet the challenges and opportunities facing our workplaces and communities NOW!

We will ignite multitudes of invisible tribes to connect and create meaningful organizations!

Please join us...

Suzanne Daigle - Business Strategist dedicated to igniting untapped human potential on today's complex issues.

Josh Allan Dykstra - Author, Work Revolutionary, Tribal Igniter.

Kevin O'Brien - Organization Transformation Specialist, formerly with W. L. Gore, a company ahead of its time.
