A/V Rider

josh allan

Computer

Josh provides his own Apple MacBook Pro 14" running macOS Sonoma 14.5 — Josh does <u>not</u> need the computer on stage, and prefers the computer be placed with the A/V crew so it doesn't clutter up the stage.

Video

Josh has a direct HDMI port, and his entire presentation is presented from his computer using a 16:9 display ratio.

Audio

Josh can use the standard 3.5mm analog headphone jack or HDMI, whichever you prefer. An audio connection is required.

Microphone

Josh requires a wireless Lavalier or Countryman microphone connected to a professional audio system.

A/V Testing

Josh requires an A/V check at least 30 minutes before taking the stage.

No Podium

Josh prefers no podium on stage. If one must be present, it must be pushed back so he may walk in front of it unencumbered.

Wifi Not Needed

Josh presents using his own laptop with all videos, audio, and content embedded in the presentation. Therefore, no internet access is necessary.

Water On Stage

Please have a bottle of room temperature (not cold) water available to Josh while on stage.
