JOSH ALLAN DYKSTRA

OPTIMISTIC FUTURIST · AUTHOR · KEYNOTE SPEAKER

A/V NEEDS

AUDIO/VISUAL

- Josh requests a wireless over the ear/Countryman microphone for any group of more than 25 people or a large space. A lavalier microphone is also acceptable if a wireless over the ear/Countryman microphone is not available. No wires, no handhelds, please.
- Josh also requests 2 confidence monitors, showing current slide and next slide plus notes. A countdown clock is preferred. Josh requires an A/V soundcheck at least 30 minutes before taking the stage.

STAGE SETUP

- Josh highly prefers to have a completely clear stage, as he will be moving around the stage for maximum audience engagement. A lectern or podium on the stage will block your audience's view of Josh speaking.

SCHEDULING & LOGISTICS

- To create some anticipation for the session and to allow for A/V setup and testing it's preferred to schedule a break before Josh presents.
- Please also consider scheduling a break right after Josh's presentation. That post-keynote energy is gold — people want to come up, say hey, ask questions, and share what just clicked. Plus, it gives the room space to process and talk about the big ideas while they're still buzzing!
- Because travel delays happen, Josh prefers to arrive the night before. Please arrange for Josh to stay at a hotel that's either at the venue or closest to the venue.

SLIDES & HANDOUTS

- Josh will usually provide worksheets directly to attendees via a QR code during his presentation. Josh can provide a PDF copy of his presentation to event organizers upon request.
- Josh owns and retains all rights to his materials and content. They are not allowed to be reproduced or distributed without permission.

RECORDING & PHOTOS

- Josh requests the ability to bring his own videographer/photographer to film and photograph the session and to utilize the video/photos online or in print.
